

DVD duplication with **Copy Protection Technology**

2 - 11 target DVD±R/RW drives

250Gb internal hard drive

Standalone – no PC required

USB 2.0 included

Easy-to-use

The Lightning Duplicators with Copy Protection technology are the only standalone DVD duplicators on the market featuring hardware-based copy protection that discourages unauthorized duplication. **Users do not require a PC or proprietary software to create copy-protected discs so there is no per-copy royalty to pay and no one to call for software licenses.** Our exclusive Copy Protection Technology embeds copy protection within each target disc making them almost impossible to copy using a computer or another duplicator.

The Lightning DVD/CD Duplicators with Copy Protection are based on the #1 selling SATA-based duplication technology. SATA-interface offers superior features such as faster data transfer rate, enhanced error checking, shielded connector to minimize interference and breakage-resistant cables. Copy Protection duplication is ideal for independent film-makers, event photographers, video production professionals and other creative artists to distribute digital video contents selectively. The protected discs play normally on DVD players and users control the option to enable playback on a computer. Users can showcase their talents without compromising flexibility!

Rigorously tested for performance and reliability, Lightning are manufactured to strict quality control standards with an aluminium case and built-in power supplies, delivering enhanced duplication at every level and at all times.

* Copy Protection Technology supports DVD-R video file only.

For duplicating Video file using DVD-R format disc only, not applicable for duplicating data files
