INTRODUCTION

The **V660 HDD Evo** is a high energy degausser, especially designed to eliminate all data from computer, laptop and server hard drives. The **V660** will also erase data from high coercivity tape, including LTO, DLT, Super DLT, AIT and many more. Hard drives are completely erased in **less than 20 seconds**.

Easy and Safe Operation: Operation of the **V660** could not be easier, simply place the hard drive into the support, close the lid and either push the "Deguass" button on the control panel, or use the infra red remote control. Each hard drive is completely erased in only four passes.

Secure and Safe: With safety in mind and to meet the latest **ICNIRP** Magnetic Exposure Guidelines, the **V660** can be operated remotely via the infra red remote control. The unit can also be locked in the manual or remote operation position by removing the key.
